

ABHISHEK KUMAR

AI/ML Engineer | Data Scientist | Generative AI Developer

abhishekkumar13516@gmail.com | +91-9131984320 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Bhopal, MP

PROFESSIONAL SUMMARY

AI/ML Engineer and Generative AI Developer with a proven track record of building and deploying production-grade AI systems. Designed and shipped a document verification platform currently live at Vedanta, built with TensorFlow, MobileNetV2, EasyOCR, and FastAPI. Currently serving as Trainee Data Analyst at Maharishi Vidya Mandir, automating ERP reporting across 150+ schools using Python and Power BI. Deep expertise in Machine Learning, Deep Learning, NLP, LLMs, RAG pipelines, and Multi-Agent AI using LangChain, Mistral AI, and Hugging Face Transformers. Published researcher in LSTM-based stock price forecasting. Certified by Oracle, Microsoft, and IBM in AI and Data.

TECHNICAL SKILLS

Languages: Python, SQL

AI / ML & GenAI: Machine Learning, Deep Learning, NLP, LLMs, LangChain, Mistral AI, Prompt Engineering, AI Agents, RAG, OpenAI API, Hugging Face Transformers

Frameworks & Libraries: Scikit-Learn, TensorFlow, PyTorch, Keras, OpenCV, Pandas, NumPy, Matplotlib, Seaborn, NLTK, SpaCy

Tools & Platforms: Power BI, Streamlit, Jupyter Notebook, Google Colab, MySQL, MongoDB, GitHub, VS Code

Cloud & Deployment: AWS, Streamlit Cloud, FastAPI, Flask, Git/GitHub

Soft Skills: Analytical Thinking, Report Building, Team Collaboration, Leadership, Problem Solving

EDUCATION

Bachelor of Technology – Artificial Intelligence & Data Science

Oct 2022 – June 2026

IIMT College of Engineering, Greater Noida

Relevant Coursework: Artificial Intelligence, Machine Learning, Deep Learning, Data Analysis, Python, Business Intelligence

WORK EXPERIENCE

Trainee Data Analyst – Maharishi Vidya Mandir – National Office, Bhopal

Feb 2026 – Present

- Managing and analyzing ERP data across 150+ schools to generate actionable insights and performance reports for strategic decision-making.
- Developing and maintaining automated data pipelines and interactive dashboards using Python, Power BI, and Excel to streamline reporting workflows.
- Performing data cleaning, transformation, and in-depth analysis to support both operational and strategic organizational goals.

Data Science Intern – SO Infotech Pvt. Ltd., Noida

Apr 2023 – Dec 2023

- Developed and deployed ML models for predictive analytics, improving forecasting accuracy and operational efficiency across multiple business use cases.
- Built Python-based applications: GUI Calculator, COVID-19 Data Analysis dashboard, Gender Prediction model, Attendance System, and Business Management System.
- Strengthened expertise in Python, data analysis, and GUI development through hands-on, production-oriented projects.

Data Science Intern – Prodigy InfoTech (Remote)

Dec 2023 – Jan 2024

- Performed end-to-end data cleaning, preprocessing, and EDA on Titanic survival and World Development Indicators datasets.
- Analyzed and visualized sentiment trends in social media data, delivering insights on public opinion and consumer behavior.
- Built analysis pipelines using Python, Pandas, NumPy, Matplotlib, Seaborn, and Scikit-learn to extract actionable business intelligence.

PROJECTS

AI-Powered Document & Signature Verification System [[PRODUCTION](#) – [Deployed at Vedanta](#)] [[GitHub](#)]

- Built a production-grade AI document verification platform using TensorFlow, MobileNetV2, EasyOCR, OpenCV, and Flask for automated document classification and signature validation.
- Implemented deep learning and OCR pipelines with FastAPI integration, enabling real-time processing of PDFs/images and improving verification accuracy and workflow automation.

Stock Price Prediction – LSTM [[Published](#)] [[GitHub](#)]

- Developed an LSTM-based forecasting model achieving MAE < 1.5% on test data, outperforming traditional time-series models by 25%.
- Processed 1,500+ days of historical stock data using TensorFlow/Keras for precise trend prediction and investment analysis.

Multi-Agent AI Research Assistant [[GitHub](#)]

- Developed an Agentic AI application with multiple autonomous agents for information retrieval, web scraping, research synthesis, and report evaluation.
- Designed a complete LLM-powered research pipeline with critique workflows, session-state management, and real-time Streamlit progress tracking.

AI Chatbot with LangChain & Mistral AI [[GitHub](#)]

- Built a multi-turn conversational AI chatbot using LangChain and Mistral AI with context-aware prompt engineering and Streamlit-based UI.
- Integrated memory management and dynamic prompt templates to deliver accurate, context-grounded AI responses.

Fake News Detection System [[GitHub](#)]

- Applied TF-IDF vectorization across Logistic Regression, Gradient Boosting, and LSTM models, achieving 30% improvement in classification over baseline.
- Built an end-to-end NLP pipeline for news credibility assessment with strong predictive performance across multiple classifier architectures.

CERTIFICATIONS

- **Oracle AI Foundation Associate** [[Certificate](#)] – Oracle | Apr 2026
- **Career Essentials in Generative AI** [[Certificate](#)] – Microsoft & LinkedIn | Dec 2023
- **Career Essentials in Data Analysis** [[Certificate](#)] – Microsoft & LinkedIn | Dec 2023
- **Artificial Intelligence Virtual Internship** [[Certificate](#)] – IBM SkillsBuild | Jan–Feb 2023
- **Python with Data Science** [[Certificate](#)] – Ducat, Noida | Apr–Dec 2023
- **IIoT Using ThingWorx** [[Certificate](#)] – IIMT, Greater Noida | Oct 2022–Apr 2023
- **Advanced Excel Financial Calculations** [[Certificate](#)] – Elearnmarkets | Aug 2022

WORKSHOPS & BOOTCAMPS

- **Workshop on Data Science** [[Certificate](#)] – Ducat | Mar 2025
- **Workshop on Power BI** [[Certificate](#)] – Ducat | Mar 2025
- **Bootcamp on Generative AI** [[Certificate](#)] – YHills | Sep 2024
- **Bootcamp on Structured Query Language** [[Certificate](#)] – YHills | Nov 2024
